Wood underlines the natural atmosphere of the outdoor environment. Wherever wood is used, people feel at ease and the style of living is improved. When used outdoors, wood can be exposed to extreme climatic conditions and therefore needs protection.

Application:

With Cetol WF 771 Sikkens offers you a special product with a high degree of UV protection and moisture resistance. This translucent product fills the wood pores using the Saturator-effect® and increases the durability. Flaking and blistering will not occur with this product. In Cetol WF 771, Sikkens uses a binder with Self-Stratifying® technology. The first component of this binder will take care of the filling of the pores and optimal adhesion to the surface. The second binder component will take care of UV protection and resistance to moisture.

At a glance:

Application: 
non dimensionally stable wooden components

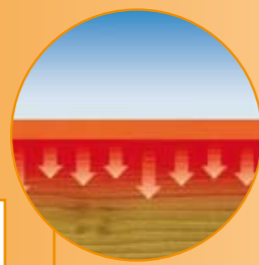

Processing:   
brushing, brushing machine, vacuumcoater

Binder type: acrylic copolymer

Consumption: 100–150 ml/m²

Color: Colors to be tinted by the Sikkens mixing system

Packsize: 10 litres

Functioning of the Self-Stratifying®-Binder

 Component 1  Component 2

Product advantages

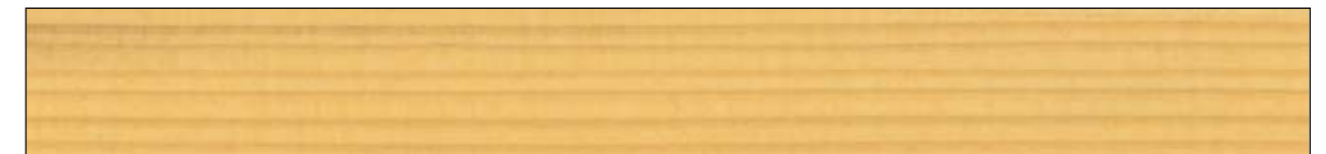

- Translucent primer, mid coat and top coat for outdoor wood
- Particularly suitable for heavy-duty wood surfaces like decks, garden furniture etc.
- UV-Protection
- High water vapour permeability
- To be used as a one pot system
- Saturator-effect® (fills wood pores and prevents early erosion)
- Optimal adhesion and film protection using the Self-Stratifying®-Binder technology

Wood	Product	Name	Application
------	---------	------	-------------

Spruce	Cetol WF 771	Rich Saffron	2 layers
--------	--------------	--------------	----------

Spruce	Cetol WF 771	Savanna	2 layers
--------	--------------	---------	----------

Spruce	Cetol WF 771	Ginger	2 layers
--------	--------------	--------	----------

Spruce	Cetol WF 771	Gold Satin	2 layers
